Typical Applications

Overview of Robotics

OneSquare is a provider of Robotic Process Automation solutions in the Healthcare space

Software robots automate the execution of tasks that **follow rules** and interface with your systems the same way as humans do

Robots are best at tasks that are:

- Repetitive
- Follow defined rules
- Support decisions by people

Interaction with HIH

Identify a suitable process to automate with key features:

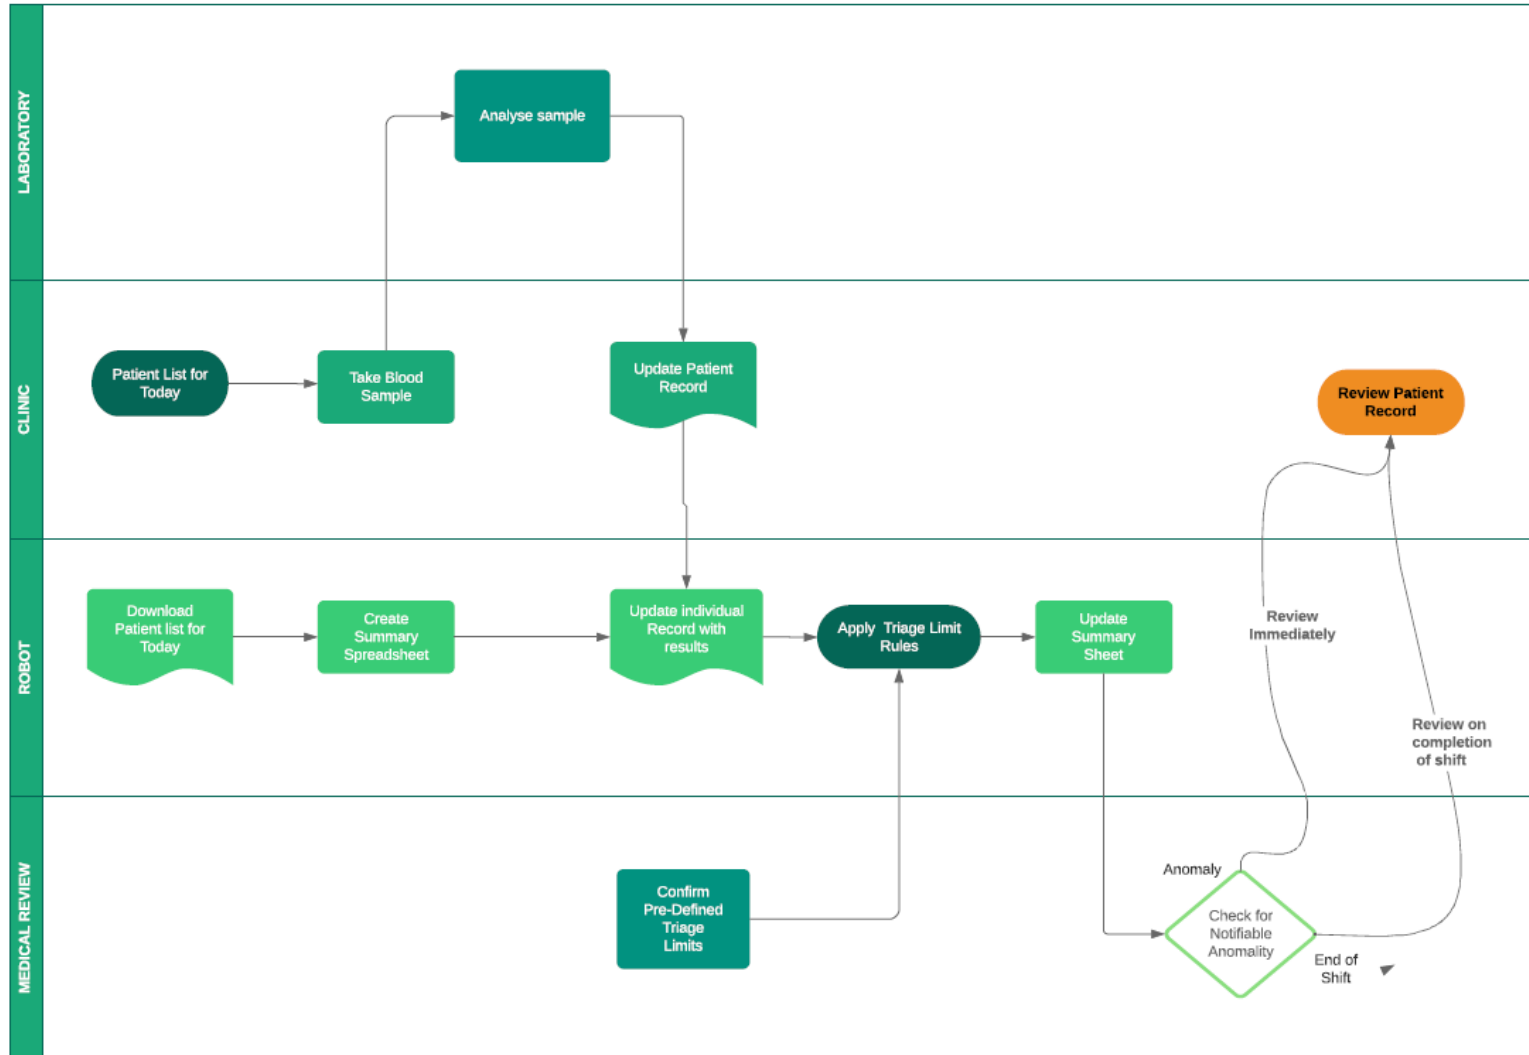

- Medically relevant
- Sufficiently complex
- Engaged stakeholders
- Unblock barriers to execution

Outcome:

Triage several processes in Renal Medicine under the direction of Dr. Liam Plant in CUH

Triage of Dietetic Blood Samples

Learning (so far)

- Essential support in identification of suitable hospital/problem
- Navigating the system is complex. HH are connected experts
- Project support beneficial in connecting to third parties
- Engaged, supportive and understanding of start-up companies
- Messaging support will be brilliant!

Robotic Process Automation
