

Implementation of an electronic patient record 2007

We choose to implement an electronic patient record in this decade and do the other things, not because they are easy, but because they are hard

Because that goal will serve to organize and measure the best of our energies and skills,

Because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win

Implementation of an electronic patient record

At no time in health have so many people with such completely different backgrounds, expertise and interests, been asked to come together so quickly, to discuss and decide on so many new concepts, with little previous experience in order to achieve so much in such a short space of time with inadequate resources

Implementation of an electronic patient record

Implementation of an electronic patient record

What is best in theory is that which works best in practice

Implementation of an electronic patient record

Complexity through simplicity
